UVT-X1 Undervoltage release

Undervoltage release

Main function: assembled with circuit breaker to achieve undervoltage protection
Rated operating voltage Ue: AC 230V, 50Hz;
Rated insulation voltage Ui 500V;
Undervoltage action setting: (35% ~ 70%) Ue;
Operating characteristics: external voltage ≤ 35% Ue, the product should prevent the circuit breaker from closing; 35% Ue ≤ external voltage ≤ 70% Ue,
The product moves and drives the circuit breaker to open; the applied voltage ≥85%Ue, the product should be able to close. The applied voltage value should not exceed 110% Ue.
Mechanical durability: The mechanical durability of the trip unit is not less than 4000 operating cycles.

Specification

参数与性能

额定工作电压Ue: AC 230V, 50Hz;

额定绝缘电压Ui:500V;

欠电压动作整定值:(35%~70%)Ue;

动作特性:外施电压≤35%Ue,产品应防止断路器合闸;35%Ue≤外施电压≤70%Ue, 产品动作并带动断路器分闸;外施电压≥85%Ue,产品应能合闸。外施电压值不应超过 110%Ue。

机械耐久性:脱扣器的机械耐久性不少于4000次操作循环。
